WHAT'S NEW FOR THE GARDEN

Here in this country we are inclined to plant the same varieties in our gardens year after year, little realizing that much work is constantly being done to improve garden crops, and some outstanding varieties have been developed.

We are pleased to offer the following varieties which we believe to be of special merit.

WADE'S BUSH BEAN (Green Pod)—This bean was awarded the All-America Gold Medal. Very disease resistant. Strong, erect plants, with pods carried well off the ground. A long, straight, slender bean, with excellent color, texture and flavor. Retains its "snap" for several days after picking. Continues to bloom and set beans over a long period. The fine appearance of this bean and its ability to stand up and look fresh should make it a favorite with market gardeners as well as for the home garden. Postpaid prices: $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 65c. Not postpaid, $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c; 5 lbs. or more @ 55c per lb.

GOLDEN ROCKET HYBRID SWEET CORN—This is the corn you have been looking for! A 10 to 12 row ear of very good size and excellent quality. And it is ready to eat before any of the rest! Just about 67 days after planting, and you can have roasting ears. Man, oh, man, will this be a popular corn. Postpaid prices: $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 65c. Not postpaid: $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c; 5 lbs. or more @ 55c per lb.

NIAGARA CUCUMBER—A vigorous growing variety that produces an abundance of dark green fruit, with firm white flesh that is crisp and tender. Long and straight, with a small seed cavity. Stands adverse growing conditions extra well, and is disease resistant. A winner for home use or as a market cucumber. Postpaid prices: Pkt. 10c; $\frac{1}{2}$ oz. 20c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.20.

SALAD BOWL LETTUCE—A top All-America award winner. A loose-leaf variety, producing rich green and very decorative wavy leaves. Stands sun well, and is a fast, vigorous grower that does not go to seed easily. This variety is well named, and is sure to prove popular. Postpaid prices: Pkt. 10c; $\frac{1}{4}$ oz. 30c; $\frac{1}{2}$ oz. 50c; 1 oz. 85c.

AMERICA SPINACH—This variety is a cross between previous All-America winners Viking and Bloomsdale, and it stands longer without bolting than any other variety of spinach. Leaves are glossy dark green, savoyed and thick textured. Spinach is good, and folks who have become disgusted with growing the old varieties because it went to seed so quickly should try this variety. Grows only 6 to 8 inches tall, but makes a spread of 10 to 12 inches, stands sun and heat well, and produces heavy cuttings. Postpaid prices: Pkt. 5c; 1 oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.00.

Dear Friends:

Quite a job, this preparing a catalog. More time goes into it than you might think. First you select the varieties you will carry, then you describe them and price them so that you, our customers, can select what you want. I hope you will find the current catalog of interest and helpful in planning your planting program. We have been serving the folks in Northern Wyoming and Southern Montana since 1926, and are sure you will find our offerings adapted to our climate. You will always find a cordial welcome at our store, so come in and ask us about anything you want to know about seeds or planting.

HINTS FOR SUCCESSFUL FLOWER GROWING

First: Prepare your seed bed well. The soil does not want to be worked when it is too wet or too dry, otherwise it will be too cloddy for fine flower seeds. Have the fertilizer thoroughly mixed into the top soil.

Second: Do not plant tender flowers too early. They will not thrive until the soil is quite warm anyway, and if planted early may germinate and then kill out if a cold spell sets in. Do not plant fine flower seeds too deep. It is advisable to mulch with Michigan Peat, to keep the top of the ground from caking.

Third: Water carefully, so as not to wash the soil when seeds are planted, or after they are sprouted.

SHADE TREES

Due to so many new homes being built in Sheridan, and so many wishing to replace cottonwoods, we are carrying a much larger stock of shade trees than we ever have in previous years. You will note that we are carrying mostly the 5-6 ft. size. Our experience has taught us that this size transplants easier than the larger trees, and take root and grow faster. (These trees are too long to send by mail.)

Other trees and larger sizes will be secured on special order if available.

Norway Poplar—A fast growing, fine shade tree. Leaves similar to cottonwood, but has no cotton. 5-6 ft. size, each \$1.00.

Moline Elm—A very graceful growing type of American elm. 5-6 ft. size, each \$2.00.

European Mountain Ash—A splendid ornamental tree, especially beautiful in fall with its clusters of bright berries. 4-5 ft. size, each \$2.50.

Green Ash—A very hardy, clean, well-shaped tree. 5-6 ft. size, each \$1.50.

Chinese Elm—A fast growing tree, widely used for shade, wind-break and hedge. If desired for shade, branches must be kept pruned from the time they are small. They withstand drought well, and do not want to be watered late in fall. These trees grow so fast, we have found it the most economical to plant good seedlings and keep them pruned. You will get a shade tree practically as soon as if you plant a larger tree, and at much less expense. Selected 3-4 ft. seedlings, each 20c; 10 for \$1.50. Selected 5-6 ft. seedlings, each 35c; 10 for \$3.00. (Also see "hedging".)

Cut Leaf Weeping Birch—An attractive ornamental tree. Silvery white bark, graceful drooping branches with deeply cut foliage. 5-6 ft. size, each \$3.25.

American Linden—A fine pyramidal shaped tree. While not a fast grower, it attains good size and makes an ideal tree for yard or curb. 5-6 ft. size, each \$3.00.

Norway Maple—A compact growing tree with broad dark green foliage. Very attractive. 5-6 ft. size, each \$2.75.

Silver or Soft Maple—A fairly fast growing tree, making a good appearance and excellent shade. 5-6 ft. size, each \$1.50.

Schwedler Maple—Its distinctive red foliage makes this tree most attractive where something "different" is wanted for yard or curb planting. 5-6 ft. size, each \$3.00.

Niobe Weeping Willow—Fast growing, hardy tree. 5-6 ft. size, each \$1.25.

An apple tree makes an excellent tree for back yard ornament and shade. We especially recommend the Yellow Transparent, the Whitney Crab, or the Dolga Crab for this purpose.

See Page 24 for prices on Apple Trees.

EVERGREENS

Heretofore we have handled Evergreens only on special order. This has been quite unsatisfactory because the wholesale nurseries from whom we buy were sold out of the sizes or varieties our customers wanted when the orders were sent in. This year we are stocking the most popular varieties of Evergreens in hopes of taking care of most of your requirements. All evergreens are shipped to us balled and burlaped and packed in bushel baskets so they will be in the best of condition for you to set out.

CARE OF ROSES

Whole books are written about the care of roses, so we can't give a complete course of instructions here. These few suggestions may be helpful.

1. When planting dig the hole deeper than the roots require, and if the soil is heavy put some coarse gravel in the bottom so your plant will get drainage; then mix the soil with some well rotted compost or manure.

2. Roses are heavy feeders, and need plenty of plant food to produce at their best. Fertilize often, but little at a time, using a good commercial fertilizer. The use of well rotted compost, cow manure or peat moss not only provides plant food but also a mulch so the ground will keep cool and moist even in hot dry weather.

We are unable to quote prices or say just what varieties we will have at this writing. Ask for this information at planting time.

AGRICULTURAL CHEMICALS

In addition to the garden line of insecticides, fungicides and weed killers described above, we also have a full line of Agricultural Chemicals for general field use.

This is becoming a major factor in increasing crop production and we endeavor to keep abreast of the latest development in this field, and will be glad to give information to you on new chemicals available for insect pest and weed control, and method of application.

CHLORDANE — TOXAPHENE

These are the wonder insecticides which have proven so effective for alfalfa weevil and grasshopper control. We have them in small quantities for garden use, or in gallon, five gallon and barrel containers for field spraying. We carry a large stock, and can supply Chlordane and Toxaphene at competitive prices for large users and commercial sprayer operators. Ask for prices.

2,4-D CONCENTRATE FOR FIELD SPRAYING—We carry 40% 2,4-D in gallon and 5-gallon cans and 30 and 50 gallon barrels. Highly effect for killing noxious weeds, also for killing annual weeds in grain fields. Consult with us about cost of weed control.

FARM FERTILIZERS

As is well known, farm fertilizer has been in short supply for some time. We are pleased to announce, however, that we are promised one or two carloads of Anaconda Superphosphate this spring, as well as a supply of NuGreen.

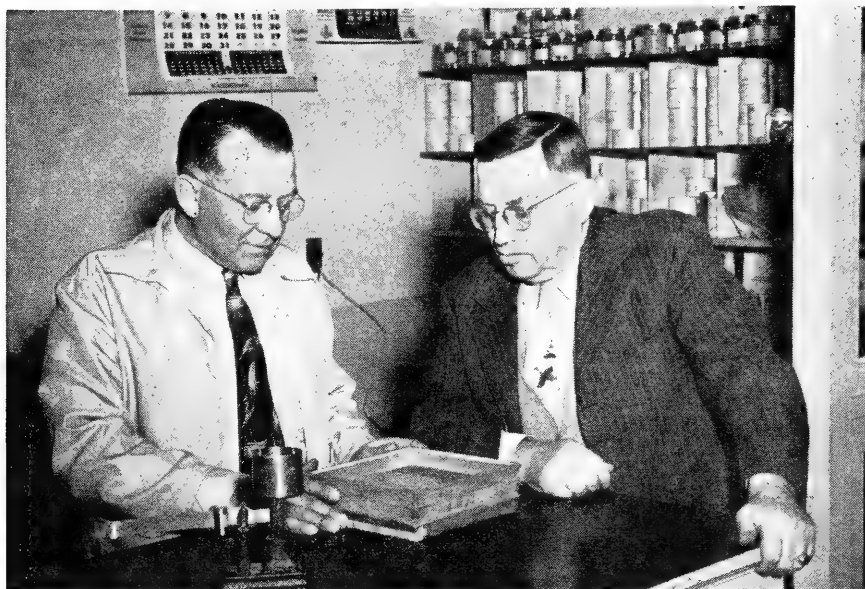

ANACONDA TREBLE SUPERPHOSPHATE. 0-43-0—The “pure quill” concentrated superphosphate by which all others are measured in terms of potency. Price: Per 80-lb. bag, \$3.35; 5 bags or more @ \$3.15 per bag; ton lots @ \$72.00 per ton.

ANACONDA AMMONIATED SUPERPHOSPHATE. 10-20-0—Superior for use on grass meadows or pastures. Price: Per 80-lb. bag, \$3.75; 5 bags or more @ \$3.55 per bag; ton lots @ \$82.00 per ton.

All prices on Anaconda fertilizers are F.O.B. Sheridan, Wyo., and are subject to change without notice. All orders accepted subject our ability to secure stock.

DuPONT NuGREEN—A superior source of Nitrogen for all growing crops. NuGreen fertilizer compound is a highly concentrated product containing 44% Nitrogen. It dissolves readily in water, but binds itself to the soil particles and resists leaching so the nitrogen losses are kept at a minimum and the full properties are of beneficial use to the crops. Leaves no harmful residues. Added nitrogen is especially needed for pasture and haylands as grasses are heavy feeders of nitrogen, which gives increased growth and protein content. Also valuable for small grains, potatoes and vegetables. Price: Per 80-lb. sack, \$7.25; 5 sacks or more @ \$7.00 each; ton lots @ \$160.00 per ton, F.O.B. Sheridan.

FARM SEEDS

Yes, Adolph and I are still testing seed. And in spite of a shortage in some items, we have almost a complete assortment of alfalfa, clovers and grass seeds as you will find anywhere. The Alfalfa we offer is, as always, all strictly locally Montana and Wyoming grown, and the prices rather high. Farm folks in the mid-west and other places have learned that the hardest alfalfa they can get comes from this territory, so the demand for the small crop produced last year was extremely good, and forced prices to a high level. Do not be misled by low catalog seed prices, however. They are for seed produced in non-hardy origins. Buy Wyoming-Montana produced seed, and be sure of a long lasting crop.

Our grass seed stock contains the new varieties that have proven well adapted to use here, as well as the old Standbys. We give below a short description of the newer varieties and their uses, and will be glad to furnish more detailed information to any one requesting it. We have made the study of grasses one of our major specialties and can help you secure the ones which will give you good results under the conditions which you have on your own place.

All prices on alfalfa, clover and grasses are F.O.B. Sheridan, and are subject to stock on hand, and to change without notice.

No extra charge for bags.

ANIMAL AND POULTRY FEEDS
